

ADESH CHAUDHARY

Flutter Developer · Mobile App Developer

+91 9305719682 · adeshpatel700@gmail.com · togetha.me · github.com/adeshpatel700-rgb · India — Open to global remote

SUMMARY

Flutter developer with 1+ year of production experience — shipped a fintech referral app (300+ users) as sole mobile engineer, and published an expense tracker to the **Google Play Store**. Proficient in Flutter/Dart, full Firebase stack (Auth, Firestore, Storage, FCM), and Riverpod/Provider state management. Reduced UI frame drops **40%** via rebuild profiling. Published open-source Flutter package on **pub.dev (120+ pub points)**. Seeking a high-impact mobile engineering role where shipping quality product matters more than pedigree.

TECHNICAL SKILLS

Languages	Dart (expert), Python (basic)
Flutter Stack	Flutter 3.x, Provider, Riverpod, Bloc, Material 3, Cupertino, go_router
Packages	Dio, http, shared_preferences, Hive, flutter_local_notifications, image_picker
Firestore / Backend	Firestore Auth, Cloud Firestore, Firebase Storage, FCM, REST APIs, FastAPI
Testing & DevOps	flutter_test (unit + widget), Git, GitHub Actions, Google Play Console, Android Studio, Postman
Open Source	http_nexus (pub.dev) — HTTP client with retry logic, interceptors, offline queue; 120+ pub points

EXPERIENCE

Flutter Developer

Sept 2025 – Mar 2026 | Remote

[Trisaran Money](#) — Fintech referral app (BankSathi/ZET model), sole mobile engineer

- Owned full-cycle development (architecture → Play Store) of Flutter fintech referral app as sole mobile developer
- Integrated Firebase Auth + Firestore supporting **300+ registered users** with real-time sync and secure session management
- Profiled and restructured widget rebuild tree, eliminating UI jank and improving frame rate by **~40%**
- Compressed onboarding from 6 → 3 screens via conditional navigation, boosting signup completion **~30%** (Firebase Analytics)
- Engineered Firebase Storage media pipeline with optimistic UI, cutting perceived upload latency by **~60%**

Flutter Developer Intern

Apr 2025 – Sept 2025 | Remote

[7Seers](#) — Mobile product studio, cross-platform app development

- Built and shipped cross-platform features in Flutter/Dart within a 5-person agile team using Git PR workflows
- Integrated **4+ REST APIs** and Firebase services with local caching strategy, improving data fetch reliability
- Resolved **20+ Android/iOS UI bugs**, improving crash-free session rate from **91% → 97%**
- Wrote widget tests using flutter_test for 3 critical UI flows; caught 2 async Firebase race conditions in code review

PROJECTS

Expense Tracker

Flutter · Firestore · Provider | [Google Play Store](#)

play.google.com/apps/testing/com.adesh.expensetracker

- Published to Play Store (closed beta) — full CRUD expense management, category analytics across 8 screens
- Implemented Firestore real-time sync + Provider state architecture with offline persistence via shared_preferences

CalorieWala

Flutter · Riverpod · Groq API · LLM

github.com/adeshpatel700-rgb/caloriawala

- AI-powered calorie tracker for Indian food — photo or Hinglish text input analysed via Groq Llama vision model (llama-3.2-90b-vision-preview)
- Camera + image picker + Dio REST pipeline returning per-meal macro breakdown; Hive local storage, clean architecture

FaithConnect

Flutter · Firestore · Firebase

github.com/adeshpatel700-rgb/Faithconnect

- Community engagement app with real-time Firestore feeds, FCM push notifications, and role-based access (admin/user)
- Architected 12+ reusable widget components with Firestore security rules and clean UI/state/data layer separation

EDUCATION

Bachelor of Computer Applications (BCA)

2022 – 2025

Manipal University Jaipur (Online)
